

Welcome to Bramble Lodge Care Home

It can often be a bewildering and stressful time for all concerned, when trying to find a home for a loved one. Prospective residents and relatives will face an abundance of choice and have important decisions to make regarding the type of care and home they are looking for.

To try and aid you during your journey, I would like to tell you a little bit about our home and our ethos.

We strive to provide the highest level of person centred care, focusing on improving each resident's quality of life and building on their existing strengths.

Our friendly, professional team, including qualified nursing staff and care assistants, work together with individual residents and their families, to assess the capabilities and level of care and support each individual requires, within a comfortable and safe environment.

We work closely with other Health professionals, such as GP Practices, Dentistry, Ophthalmologists, Chiropodists and Specialist services where appropriate, to ensure that all needs are met.

All dietary needs are catered for and our Chefs consistently produce high quality meals and snacks each and every day. Visiting friends and family are also welcome, for a nominal charge.

Spiritual needs can also be met as required.

The whole team is dedicated and passionate about those we care for and work together to promote great care, encourage independence and offer stimulating activity and friendship.

We actively encourage social interaction between residents and our Lifestyle Support Coordinators, along with the trained staff, offer a comprehensive programme of activities, tailored to individual needs.

I would be delighted to meet with you, should you choose to visit and I am happy to answer any questions that you may have.

Please do not hesitate to contact me if you wish to discuss anything further.

Kind regards,

Elise Smithson – Home Manager
